🏛 Education

⇒ **MIT-WPU'25 PUNE** : BTECH in Computer Science
Relevant coursework : DBMS , CN , OS , OOPS , Blockchain , Computer Graphics

💡 Skills

⇒ Technical : C, C++, Java, Version Control, Github, RESTFUL API, Data Structures & Algorithms , Socket.io , React-Context , React-Redux , VPS Cloud Server . Vercel , Hostinger .

⇒ Full Stack Developer : Front-end : Reactjs , Nextjs , Vite , TailwindCss , Bootstrap | Back-end Server : Nodejs , Javascript , Typescript | Database : postgres sql , MongoDB , Mysql

⇒ Blockchain Developer : Networks :- Ethereum , Tezos , Stellar | Smart Contract : Solidity , Smartpy , Dart & Rust | Back-end Server : Web3js , etherjs | Front-end : Javascript , Typescript , Reactjs ,nextjs | Database :- IPFS

⇒ Software Developer : Programming Languages: C++, C, Java | Development Tools: Visual Studio, Eclipse, Git | Operating Systems: Windows, Linux | Software , Development: Object-Oriented Design, Algorithms, Data Structures

💼 Professional Experience

⇒ 2024 - Rust Smart Contract Developer , DApp World

Developed & put in place a decentralized application & smart contract utilizing Soroban, Dart, & Rust on Stellar Blockchain.

⇒ 2024 - Present - Freelancer

Built eye-catching websites for customers, collaborating closely with them to ensure their satisfaction & project completion .

⇒ 2023 – Full-Stack Developer , Navodita Infotech

Created a data analysis dashboard using React.js for the responsive design, Node.js for the frontend & Express for the backend.

💡 Projects

⇒ 2023 - Blocks Gaming - The Future of Blockchain Gaming (Full Stack Development & Blockchain)

Powered by Next.js, Node.js, Express.js, Web3.js, Socket.io, TypeScript, Taquito, Tailwind CSS, Prisma, chess.js, & Context API, along with IPFS & NFTs.

⇒ 2024 - Blocks MeeT - Online Secured Meeting System over Blockchain (Full Stack Development , Blockchain & Cybersecurity)

Created a safe file-sharing system with integration for the Tezos blockchain & made real-time video conferencing possible for improved teamwork.

⇒ 2024 - NFT-Based Gating System on the Ethereum Blockchain - Full Stack Web Development & Blockchain

Using Web3.js, ReactJS & Solidity, I developed the NFT gating system on the Ethereum blockchain, demonstrating my proficiency with blockchain technology & user interface design

⇒ 2023 - GitaGPT: Your Personal Guide to Spiritual Wisdom - Full Stack Development & AI ML

Individualized spiritual direction with a focus on the Bhagavad Gita that gives direction & clarity

⇒ 2024 - Dashboard for Data Analysis - Full Stack Development & Data Analyst

Developed a data analysis dashboard featuring visual graphing .

🏆 Awards & Achievements

⇒ Asia Winner of TezAsia Hackathon 2023 : Secured the second rank in the gaming track.

⇒ Secured 3rd place in Contest-9 (DApp World)

⇒ First Rank in Blockchain & Cybersecurity Domain (SIH'23 University Internal Hackathon)

⇒ 100 + Github Repositories , 85 + Projects

💼 Certifications

⇒ SIEMENSROBOTICS& AUTOMATION - NITTTR-SIEMENS CENTRE OF EXCELLENCE BHOPAL

💡 Publications

⇒ 2024 – A Comprehensive Assessment and Review of Blockchain Integration in Online Gaming
